Austin Calvelage

Software Engineer

SUMMARY

Creative, detail-oriented, software engineer with a desire to provide nothing short of the most pleasant user experience. Proven track record of creating and implementing successful front and back-end web applications. Looking to bring my skills to a tech company with global reach.

WORK EXPERIENCE

Software Engineer at 100devs, Los Angeles, CA

January 2022 — Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices

- Built semantically structured full-stack web applications

- Applied agile methodologies like SCRUM for project management

Recent Projects:

Hyper Exertion (Fullstack Web App) – Client signs up the application takes in information such as goals, limitations and what equipment they have available to them. This information is sent to the Personal Trainer dashboard where they look for the client's submission if they are a good fit for the program, if so the trainer will accept them into the program and deploy weekly workouts to the client's dashboard featuring step by step instructions on how to perform each exercise including a video tutorial.

Connhaus Boarding (Fullstack Web App) – Users can signup/log in to the app. Submit details about their dog. Once accepted into the program they select from available dates on the calendar when they can board their dog.

Maintenance Technician at Procter & Gamble | Lima, OH

March 2016 — January 2022

- Building capability with new hires and co-workers

- Create and maintain Job Aids, Site Operational Procedures, and Safety and lubrication maps for both Machinery and maintenance tasks.

- Inspect machinery routinely to request downtime to plan for both emergency and routine maintenance tasks. As well as maintain a database of all open defects on equipment.

- Recommend and execute equipment improvements to eliminate safety defects and increase runtime productivity
